Greetings from the
President

Looking back over the past year, there are many accomplishments to celebrate at Chadron State College.

Three Chadron State College alumni distinguished themselves in their roles as educators. Tyler Bartlett was named the 2015 Teacher of the Year in Wyoming, Tami Hughson was chosen by parents as the South Dakota Special Education Teacher of the Year, and Heath Peters was selected the Nebraska Principal of the Year.

Kim Phagan Hansel, an advocate for adoption and foster parenting, was honored at a ceremony in the nation’s capital.

Three faculty members, Dr. Kurt Kinbacher, Dr. Steve Coughlin, and Dr. Robert McEwen each had books published this year. Other faculty members presented at national and international professional gatherings and wrote articles published in peer-reviewed journals.

In addition to planning and participating in performances, service projects, exhibits and conferences on campus, CSC students also demonstrated success at the national level. Two CSC students, Drew Kasch of Highlands Ranch, Colorado, and Troy Fields of Halsey, Nebraska, placed in the top 10 at the Phi Beta Lambda national competition. Wyatt Clark of Wellfleet, Nebraska, competed at the College National Finals Rodeo in Casper.

The largest-ever construction era on campus is also drawing to a close. Three Eagle Ridge housing units opened in August 2014. The Rangeland Complex features practical use of natural resources such as natural light and heat, ground source heat pumps, energy efficient windows, LED lights and water retention areas. It takes a lot of people working behind the scenes to complete these major projects.

The Chicoine Center was host to December and May undergraduate commencement ceremonies as well as several basketball games. It is an impressive structure and represents the broad base of support for CSC.

Other developments include the opportunity to welcome two new academic deans to the campus community. Dr. Jim Margetts will lead the School of Liberal Arts after a year in the position on an interim basis. Dr. Jim Powell is the new dean of the School of Counseling, Education, Social Work, Human Performance and Psychology replacing Dr. Margaret Crouse who retired in June following 26 years working at CSC.

Building on our strong tradition as an educational leader, the next year holds promise. As we welcome new students to campus, we anticipate their growth and change as they build the foundation for their future at CSC.

Sincerely,

Dr. Randy Rhine
President
Greetings from the

Foundation

It is an honor for me to serve as chairman of the board of the Chadron State Foundation. My two year term ends this fall and it has been a very rewarding experience, all due to our excellent professional staff and dedicated board of directors. I look forward to continuing on the board and working closely with Linda Redfern as she begins her term as your new chairman. We greatly appreciate the service of Chad Emanuel, Fran Grimes and Sid Harchelroad as directors whose terms ended in 2015. They were outstanding board members and we know we can count on them to continue their strong support of CSC.

In May 2014, the board held an “advance” to plan the next five years goals for the foundation. This past year, your Chadron State Foundation team has made great progress towards those goals. The board made a commitment to CSC to raise $2 million in private support toward the renovation and addition to the Math & Science Building. It’s a much-needed improvement for CSC students and faculty. We have met regularly to develop the long-term strategy for major gifts development which will aim high on many other objectives: first and foremost, a big increase in the total scholarship endowments. To make that happen, and as part of our strategic goals, we completed our executive search for a Director of Major Gifts for the foundation who will focus on that much needed area of development.

Your foundation has had another successful year raising funds for CSC students and providing them with scholarships and other key support. Your loyalty as donors, friends and alumni continue to support the success of Chadron State students. Private giving for the fiscal year ending June 30, 2015, totaled almost $1.2 million from 3,016 corporate, foundation and individual donors. Special gifts included a $300,000 challenge grant from an anonymous donor to purchase laboratory and classroom equipment for the Rangeland Complex. The vision Chadron State established in 2011 continues to become a reality with completion of Phase 2 of the Rangeland Center and the Coffee Agriculture Pavilion, as well as completion of the Chicoine Center.

Today, your foundation endowment funds are over $17 million and total assets exceed $20 million. Last year, more than 565 students received a scholarship from the Chadron State Foundation totaling $610,982, and over $1 million was given by the foundation for campus support, including capital construction.

On behalf of the entire Chadron State Foundation team, thank you. Your support is critical to your foundation’s work to invest in the students, faculty, staff and the needs of the campus. Let’s all continue our support for Chadron State!

Sincerely,

Jim Wefso, Chairman
Chadron State Foundation
By George Ledbetter

Nearly five decades after his departure from the Chadron State College arts faculty, attention has grown steadily on African-American sculptor and ceramicist William (Bill) Artis and the legacy he left at CSC.

Artis was born in 1914 in North Carolina. He was just 18 and a New York City resident when he won a major prize in sculpture and earned a mention in Time magazine. His works appeared in national exhibitions in the ‘30s and he studied with a noted Harlem Renaissance sculptor before joining the U.S. Army.

After his wartime service, Artis earned degrees in fine art from Syracuse University. An interest in Sioux Indian culture brought him to the Pine Ridge reservation in South Dakota in the early ‘50s. There he taught school and supervised a pottery production project before joining the CSC faculty in 1954.

As an instructor of sculpture and ceramics, Artis was popular with students. “The students loved this man. They idealized him,” said CSC art professor Richard Bird, who helped rekindle interest in Artis in the 1990s.

The short, black man always wore a white shirt and tie to classes, donned an artist’s smock when working and had a good sense of humor, his students recalled. He was also generous and many people report receiving pieces of his pottery or other items as gifts.

While at CSC, Artis’ work continued to attract attention. He won national honors for sculpture several times, had pieces selected for major museum collections, and became known for his terra cotta figures and sculptures of African-American subjects.

Artis left his job at CSC in 1965. In late 1966 he was hired by Mankato (Minnesota) State College, where he taught until 1975 and earned additional recognition for his art and teaching.

He died in Northport, New York, in 1977, after a lengthy illness and is buried in Long Island National Cemetery in New York.

Artis is now considered a pioneering figure in African-American sculpture and ceramics. His pieces are in important museum collections, including the Smithsonian Institute. Many of his works are in private hands as well and can command prices in the tens of thousands of dollars in arthouse auctions.

Chadron State may have the largest and most diverse collection of Artis’ pieces in the country, said Bird. “We’ve got pencil drawings, busts, some mosaics, ceramic sculptures and ceramic pots,” he said. “He was known as a sculptor. Many places don’t know he did an oil painting now and then.”

The nucleus of CSC’s collection came from works left behind when Artis left his teaching post. Bird said he discovered the pieces in storage in 1988 and began using them in teaching.

The CSC collection now includes 25 pieces and an archive of correspondence and photos, thanks to donations from alumni and others. Bob Yost, a 1964 graduate, donated several works by Artis, along with letters and other papers to the college. More recently alumna Annette (LaMay) Davies donated a bust that had belonged to her father, Joe LaMay, who took classes with Artis and admired his talent.

Awareness is also growing of the lasting impact the gifted artist and teacher had on students during his tenure at CSC.

“My career in teaching was very art-based due to Dr. Artis’ influence,” said 1962 graduate Karen Griffith Talbot.

Don Ruleaux, who remained friends with Artis for years, remembered valuable advice from his former instructor.

“He told me ‘You have to have food, clothing and lodging. Become a teacher and do your art on the side.’”

That led Ruleaux, an award-winning artist himself, to a teaching career that included a decade at CSC.

Current and future students also benefit from Artis’ legacy, thanks to monetary donations made in his name. Mike Chipperfield, a 1964 graduate and retired Ohio University art professor, spearheaded an effort to start a scholarship endowment in Artis’ name. The Chadron State Foundation began awarding scholarships from that account in 2005-2006.

“We hear stories about William Artis from alumni and friends across the nation,” said Foundation Executive Director, Connie Rasmussen. “We are proud of the unique Artis collection we have now and are grateful to the many alumni who have donated pieces of his work to the collection. It is our hope to have a permanent, revolving display of Bill Artis pieces and would like CSC to be a permanent home for more of the work of this gifted artist and teacher.”

CSC host to a legacy from noted Black artist
By Con Marshall

It all began at the Chadron State spring football game in 2011. As usual, Del and Aletta Hussey were in Don Beebe Stadium to watch the Eagles in action.

Before long, Del struck up a conversation with a young lady who was sitting nearby. The facts were Kate Simonton was not a Chadron State student. She was on spring break from Fresno City College and was visiting to watch two of her friends from California, Danielle L’Argent and Ashlynn Marino, play softball for the Eagles later in the day.

Del also learned that his new acquaintance was an athlete. Kate had played basketball in high school and had planned to play at Fresno City, but was forced to sit out the 2010-11 season while recovering from a knee injury. He learned that she was a biology major who hoped to become a teacher.

Drawing on his 33 years as an employee of Chadron State, including 25 as director of financial aid, Del had some suggestions for his new friend. Kate should check out Chadron State while she was on campus and maybe transfer. He urged her to talk to the financial aid personnel, meet with a science faculty member and talk to Tim Connealy, the women’s basketball coach.

Now, more than four years later, there’s much more to the story.

Kate made the switch to Chadron State, played four years of basketball for the Eagles, will be student teaching this fall and considers the Husseys her “second parents.”

“They showed an interest in me, made me feel at home and kept me at Chadron State,” Kate said this summer. “I’ve had a terrific time here and much of it is because of them.”

Through Kate, the Husseys became friends with the softball players, Danielle and Ashlynn. The fall after Kate had transferred, the couple also met Kate’s mom and grandmother when they came for a visit.

At the end of her second season with the basketball team, Del and Aletta provided moral support when Kate required surgery to repair a shoulder injury. She also “hung out with them” last spring when she used Chadron Creek, which runs through their property, to conduct research for a biology course she was taking.

Del admits that he enjoyed the postgame conversations among the players.

“I learned what went right and maybe what hadn’t worked so well by just listening,” Del said. Kate adds that he always saw the bright side and soon was helping them overcome any disappointments and to start focusing on the next game.

“And, when we won, both he and Aletta always had big smiles and joined us in celebrating,” Kate noted.

That was certainly true last January, when, with only seconds remaining, Kate drove the lane, split two defenders and hit the winning shot off the glass as the Eagles beat Colorado-Colorado Springs, 72-70. The Mountain Lions had a 16-2 record at the time. During the next game, Kate sank a career-high 22 points as the Eagles toppled Metro State 79-72. That called for another celebration.

Kate is not the first person with Chadron State connections that the Husseys have befriended. They have a couple of scrapbooks containing photos of former students and employees they got to know in a special way and have remained in contact with them.

Del often mentions how privileged he was to have spent more than three decades working at the college. Since retiring in 2002, he and Aletta have remained connected with what’s happening on campus.

“We go to most of the ball games, but also love to attend theater productions, the concerts and the art shows in Memorial Hall,” he said. “There’s always something going on in the Sandoz Center and we really enjoy following the rodeo team.

“All the energy we see helps keep us young. It is even more fun when we get to know the students . . .”

— Del Hussey
Questions and Answers with Larry Riley

By Alex Helmbrecht

Larry Riley has spent much of his life around the game of basketball. After serving as the general manager for three seasons, he's currently the Director of Scouting for the Golden State Warriors, who won an NBA championship in June, but he's been involved with basketball at the highest level for 27 years.

Before the NBA, Riley served as the head coach at Eastern New Mexico for 10 years. He also coached basketball at CSC and led the Eagles to a pair of 17-9 records. He was inducted into the Athletic Hall of Fame in 1993. While at Chadron State, he was an all-around athlete and was named the college's outstanding senior majoring in physical education when he graduated in 1966.

Q: How did attending Chadron State College prepare you for your career?

A: My time at Chadron State was really more about personal development, so to speak. There's no question that you go to classrooms and you learn as much as you can and I had success doing that. But personal relationships were so important to me and they still are. I would watch people of strong character and how they controlled themselves and how they interacted with others and that made me think they were special. Seeing them operate helped me develop a little bit. I'm thinking specifically of Ross Armstrong. He's one of the greatest people there will ever be at Chadron State. I felt the same way about Mack Peyton and, on the education side of it, Dr. Pat Colgate. Those were three people who had a tremendous impact on me and what a person could become.

Q: What's your best memory while you were a student at CSC? What's your best memory when you worked at the college?

A: As a student, this is kind of crazy. I played in one of the best games ever in Chadron State's men's basketball history. We played Southern Colorado and they were a great team. I'm sure that game went into double overtime and I think Felix Sanford had 31 rebounds in that game. We won that game but I didn't make a shot but it was exhilarating to be involved with.

When I was coaching, we won the holiday tournament and we beat Mount Marty College. In all honesty, most everyone thought they were better than us but we upset them and won the tournament. That set us in a direction where all our players believed that we could be successful. We were a good basketball team and that game was a turning point I remember vividly.

Q: How special was the championship run the Golden State Warriors put together and what does that mean to you since you had such a vital role in the development of the team?

A: I've said it before, the most enjoyable times I've had were coaching college basketball at Chadron and at New Mexico. It was always delightful because I valued the impact you could have on the players and the students and others around you. Once you get to the NBA, that changes. You're dealing with men and you're going to have a different impact on their lives because it is all about winning. One of the things I learned through the NBA experience is that if you have average intelligence but a great work ethic, you'll do just fine. For me, if I hadn't had my work ethic, I would have washed out early on. You have to handle yourself in a manner where you maintain that team mentality because you don't want to alienate anyone.

Q: How do you stay in touch with Chadron State College, despite being such a busy man?

A: I make it a priority. The three people I mentioned earlier – Ross, Mack and Pat – were so influential to me, and to me, there were a lot of others who were solid people at Chadron State College, too. Overall, CSC was good for me and it's important for me to maintain a relationship with a college that has done a great deal for me.

Q: What drives your desire to give back to Chadron State College?

A: Just the fact that the college did so much for me. I feel like it was a place where I was able to succeed in the classroom and have success as an athlete. I was given an opportunity and I've never forgotten it. I have a warm place in my heart and it will always be that way. I wouldn't be where I am without Chadron State College.
Scholarships and endowments provide financial support to hundreds of Chadron State College students each year. There are two types of scholarships: "Annual scholarships" may be established to honor or recognize a group, family, or business. Annual scholarships require a minimum of $500 and rely on continued annual contributions. Donors provide the agreed sum of the scholarship annually, unless they notify the Foundation office by January 1 of the year they intend to discontinue the award.

"Endowments" that honor a group, family or loved one are a perpetual fund that provides ongoing support to CSC students. Criteria for the grant may be as general or specific as the donor wishes and may be changed upon written notification to the Chadron State Foundation.

Named endowments may be established with any amount but must reach the minimum of $10,000 within five (5) years. Endowments are subject to market gain or loss, the principal of the endowed fund will remain intact. The award is based on a three year moving average of the endowed portfolio balance.

Additional information may be obtained by contacting:
Chadron State Foundation

classroom and laboratory building which is currently nearing completion.

Social Work programs receives reaffirmation through 2022
The Council on Social Work Education Commission on Accreditation voted to reaffirm the Chadron State College baccalaureate Social Work program to its full accreditation. The reaffirmation will be effective through October 2022. In social work education, this commission is the sole agency recognized by the Council on Higher Education Accreditation to accredit baccalaureate and master’s degree programs in the U.S. and its territories.

Madrigal dinner raises funds for Ireland trip
The music department organized and presented a madrigal dinner as a fundraiser for a choir performance tour to Ireland. The Renaissance feast included dinner, music and a mashup of fairy tales. The concert choir, men’s and women’s choirs, brass and woodwind sections and vocal quartets performed numbers from the late 15th century.

Simpson wins national title; places internationally
Damarcus Simpson of Lafayette, Georgia, placed fourth during the North American, Central American, Caribbean Association Championships in San Jose, Costa Rica, in August. Earlier, during the NCAA Division II Outdoor Track and Field National Championships in Michigan, he won the national championship in the long jump with a leap of 26-feet, 3 ¾ inches. He is just the third national champion in track and field and the 12th overall at CSC.

Student earns NASA internship
Joslynn VanDerslice, a junior from Columbus, Nebraska, began an internship with NASA in June working with the Mars 2020 mission. The experience is a 10-week —long internship at the Jet Propulsion Laboratory located in La Cañada Flintridge, California. VanDerslice is majoring in geoscience with a minor in water resources management.

Stodola claims regional award
Jessica Stodola, a Clarkson, Nebraska, native, who graduated in May, was presented with the Region 5 National Intramural Recreation and Sport Association Award. The award recognizes top students employed in college recreational departments. Stodola helped plan and oversee the group fitness program, “Eagle Fit,” that began in the spring of 2014. The award was presented in Dallas, Texas.

Track garners All-Americans
Stachia Reuwsaat of Black Hawk, South Dakota, earned her second All-American honor in the long jump. She placed seventh with a school record jump mark of 20-3. Mel Herl of Eaton, Colorado, also earned All-American honors when she finished fourth in the discus. Herl’s first toss in the finals gave her the school record at 170 feet even.

Foundation Facts
- Foundation support available to the campus for the 2015-16 academic year: $2,474,050
- As of June 30, 2015, total Foundation assets: $20,180,022
- Endowment portfolio assets: $17,518,911
- 565 students received scholarship support
- 771 Foundation scholarships were awarded
- Rangeland Challenge: 17 donors with pledges or gifts leveraged $300,000 matching funds
  The Challenge grant finances the equipment and furnishings for the facility. Everything from computers in the classrooms to microscopes in the laboratory to cattle chutes in the arena are funded through the Challenge grant.
Student athletes make the grade

Chadron State's student-athletes also proved they can get the job done in the classroom. Seventy-eight CSC student-athletes earned All-Academic honors from the Rocky Mountain Athletic Conference. To be eligible, the student-athlete must maintain a 3.30 cumulative GPA. Four football players were named CoSIDA Capital One Academic All-Americans. In the last two years, eight CSC football players have earned that distinction, the second-most in the country.

Students engaged in service

While Chadron State College strives to provide learning opportunities for students, the campus also wants its constituents to partake in service-based initiatives. Two such events in the spring included The Big Event and the Nearly Naked Mile. The Big Event, organized by students, faculty and staff, had more than 600 volunteers work on more than 80 job sites in and near Chadron. Projects ranged from yard work and trash removal to cleaning and painting. The Nearly Naked Mile volunteers accumulated 8,000 items of clothing from students and staff and donated it to charity. This was the fourth year for the event coordinated by CSC students.

Research by CSC faculty recognized

Dr. Hem Basnet, associate professor of economics and finance, presented two research papers at the Midwest Economics Association conference in Minneapolis, Minnesota. Also, a recent research paper by Dr. Shafiq Rahman, associate professor of communication arts, was recognized by peer reviewers as one of three top papers in the Political Communication division during the Eastern Communication Association’s 2015 conference.

Faculty publish books and articles

This year was notable for faculty publications. Two CSC assistant professors recently had books published. Dr. Kurt Kinbacher’s “Urban Villages and Local Identities” is an extensive research account of immigrants living in Nebraska. Dr. Steven Coughlin’s “Another City” is a collection of 28 poems. Dr. Robert McEwen, professor of English, published a book of blank verse poetry, “Casey Joe MacBride’s White River, Volume I.” An article by Dr. Barb Limbach and Dr. Wendy Waugh was published in a peer-reviewed journal.

Wada wins Teaching Excellence award

Dr. Jamie Wada was named the CSC recipient of the Teaching Excellence award in early April. Wada, justice studies professor and department chair, began teaching in the CSC Justice Studies department in 2007. His teaching areas include policing, criminology and forensic studies.

Perlinski elected to state range office

Faculty member Anthony Perlinski was elected to serve a five-year term as an officer of the Nebraska Section, Society for Range Management at the group’s annual meeting in North Platte, Nebraska, in October. Perlinski, an assistant professor in the Applied Sciences department, will serve as a council member this year. During the fourth year he will serve as president of the organization.

College Facts

- Majors and Programs: Over 70 majors and programs and eight graduate programs
- Student-faculty ratio: 19-1
- Average class size: 17
- Faculty excellence: 79 percent of our full-time faculty hold the highest degree in their fields
- Tuition: $195 per undergraduate credit hour
- Enrollment: 3,033 from throughout the U.S. (2,453 Undergraduate, 580 Graduate) Approximately 60 international students
- 2014 Fall Incoming Class = 636 (460 Full-Time Freshmen, 176 Full-Time Transfers)

The 2,453 enrolled undergraduate students at CSC had the following characteristics:

- Represented 28 countries including the U.S
- Represented 44 states and Puerto Rico
- 57% of CSC students were from Nebraska, followed by Wyoming (11%), South Dakota (8%) and Colorado (7%)
Marshall honored for service

Con Marshall, information officer, was honored for decades of dedication to the college in October when he received the Distinguished Service Award. Marshall was also elected to the Rocky Mountain Athletic Conference Hall of Fame in July and was the undergraduate commencement speaker in December.

Gaudet presents at neuropsychology conference in China

Dr. Laura Gaudet, counseling and psychology professor and department chair, represented the college at a May international neuropsychology conference in China.

Neuro-Talk 2015 was a conference for industry scientists, clinical investigators, academic physicians and pharmaceutical professionals from more than 30 countries. The goal of the gathering was developing therapies for the most challenging neurological diseases through research studies and technology innovation.

Alumni receive state awards

Several CSC alumni received awards this year and have enhanced the reputation of CSC’s excellent education department.

Tyler Bartlett of Newcastle, Wyoming, was named the Wyoming Teacher of the Year. He is a 2008 graduate of Chadron State College and recently completed his sixth year of teaching middle school math.

Heath Peters, who earned both his bachelor’s and master’s degrees from Chadron State College, was named Nebraska’s Middle School Principal of the Year. He serves as the principal of both the senior high and the middle school at Mitchell.

Tami Hughson, a 2013 graduate of Chadron State College, recently received the South Dakota Special Education Teacher of the Year award. She teaches special education and general education for fifth and sixth grades in Oelrichs, South Dakota.

Michael Sandstrom of Yuma has been named the 2015 James Madison Fellow for Colorado. The history fellowship, established by Congress in 1986, is designed to improve the teaching of the Constitution in American schools. Sandstrom will earn six hours in constitutional study at Georgetown University when he completes the summer 2016 institute.

President Randy Rhine and Vice President Dale Grant gave a tour of an Eagle Ridge housing unit to members of the Chadron State Foundation board of directors during their August meeting.
