## Laboratories

The CSC Child Development Center Laboratory serves as an educational program for the purpose of 'educating educators,' who care for and about young children. The Laboratory provides high quality, developmentally-appropriate, actively-learning experiences for families with children between the ages of 2 and 9, of all ability levels. All children are eligible to attend the Laboratory regardless of income status, race, religion, origin, cultural background, gender, residence, ability or family status. The Laboratory is state-licensed by the Nebraska Department of Health and Human Services and is nationally-accredited by the National Academy of Early Childhood Programs. The Nature Explore Outdoor Learning Environment is certified by the Arbor Day Foundation and the Dimensions Educational Research Foundation.

The FCS program also maintains a "living room laboratory" enabling students to study lighting, furniture arrangements and accessorizing. Food Science and Meal courses are conducted in a laboratory setting as well as Textiles, Alterations and Construction courses are taught in a well-equipped laboratory.
